

Amendments to the Specification:

Please replace the paragraph beginning at page 1, line 29, with the following rewritten paragraph:

–One solution consists in making mat the zones that cause parasitic light rays
[[mat]], by texturing (~~grainings~~, ridges) the mould that is used to produce the
mask.–

Please replace the paragraph beginning at page 7, line 9, with the following rewritten paragraph:

–The three elements, casing 12, protective covering 16 and mask 13, are ~~made of~~
injection molded from a thermoplastics material ~~by injection~~.–

Please replace the paragraph beginning at page 7, line 18, with the following rewritten paragraph:

–The mask 13 is obtained by ~~injecting~~ injection molding a thermoplastics material
such as transparent polycarbonate that is dyed an amber color.–

Please replace the paragraph beginning at page 8, line 14, with the following rewritten paragraph:

– The three elements, casing 22, protective covering 26 and mask 23, are ~~made of~~
injection molded from a thermoplastics material ~~by injection~~.–

Please replace the paragraph beginning at page 8, line 23, with the following rewritten paragraph:

– The mask 23 is obtained by ~~injecting~~ injection molding a thermoplastics material
such as transparent and colorless polycarbonate.–

Please replace the paragraph beginning at page 9, line 19, with the following rewritten paragraph:

–The three elements, casing 32, protective covering 36 and mask 33, are ~~made of~~
injection molded from a thermoplastics material ~~by injection~~.–

Please replace the paragraph beginning at page 9, line 26, with the following rewritten paragraph:

—The mask 33 is obtained by ~~injecting~~ injection molding a thermoplastics material.—

Please replace the paragraph beginning at page 10, line 7, with the following rewritten paragraph:

—This method therefore makes it possible to produce an optical function of suppressing parasitic reflections on a metallized mask, without particular treatment of the mould used to ~~injeet~~ injection mold the mask.—

Please replace the paragraph beginning at page 10, line 27, with the following rewritten paragraph:

—The reflector 40 is obtained by ~~injecting~~ injection molding a thermosetting plastics material.—

Please replace the paragraph beginning at page 11, line 29, with the following rewritten paragraph:

—Moreover, the invention has been described solely in the case of forming by injection molding, but forming by stamping may also be used, in particular when using a material such as sheet metal.—

Please replace the paragraph beginning at page 12, line 1, with the following rewritten paragraph:

—Likewise, the description related to injection molding of plastics material but it may also involve injection of a material such as aluminum, the laser radiation acting directly on a surface of the part made of aluminum.—
